

TRI-FUEL CONVERSION KIT

For Engines

KOHLER[®]
IN POWER. SINCE 1920.

One Kit, THREE FUEL OPTIONS.

Gasoline, propane or natural gas. Now you can give customers fuel flexibility and convenience with the Tri-Fuel Engine Conversion Kit*. Thanks to a specially designed carburetor, KOHLER® horizontal gas engines can operate on three different fuels. Once installed, the user just turns the dial to fuel with gasoline, propane or natural gas. Today many contractors are using gasoline in their portable generators and utility equipment. They'll appreciate the flexibility to connect to propane or natural gas at home or on the job—especially if a power outage creates fuel shortages.

EASY-TO-INSTALL CONVERSION KIT

- Kit can be ordered and installed by OEMs, distributors and dealers

BENEFITS OF PROPANE

- Clean-burning propane reduces harmful carbon emissions
- Odorless and nontoxic—no gasoline smell
- More cost-efficient than gasoline

BENEFITS OF NATURAL GAS

- Clean-burning fuel that costs less than gasoline
- Helps reduce harmful carbon emissions

*Kit can be installed on KOHLER Command PRO® models CH270TF/CH395TF/CH440TF.
