

## KOHLER® Command PRO® EFI ECH440

**Reggio Emilia, Italy – May 2018** – Kohler presents the Command PRO® EFI ECH440, the single-cylinder engine that integrates closed-loop electronic fuel injection technology (EFI). The 14 hp engine brings the benefits of Kohler EFI – including enhanced fuel efficiency, greater overall reliability, and easier starting in harsh conditions – to a wide variety of equipment, such as generators, chippers, concrete saws, welders, utility vehicles, stump grinders, air compressors, tillers, water pumps and more.

The Command PRO® EFI ECH440 controls and manages the exhaust through the closed-loop system, thus burning the proper amount of air: this control notably extends the life of the engines.

The Command PRO® EFI ECH440 offers better fuel economy than similarly sized carbureted engines\*. Plus, KOHLER EFI engines save cash at the pump - and save time on refueling\*.

The starter is one of the key feature of this model: the Command PRO® EFI ECH440 starts like a car, with no choking. There is no carburetor, so there is no carburetor downtime. From there our closed-loop electronic fuel injection system gets the most from every ounce of fuel.

Therefore, the equipment is always running – and earning – and end users are more productive.

It is more reliable because it has no carburetor and no choke. Moreover, the EFI diagnostic software, sold separately, provides quick and easy troubleshooting to minimize downtime.

The experience of Kohler on EFI (electronic fuel injection) system is rooted in history. Kohler released the industry's first closed-loop EFI system in 1996 and the industry's first engine mounted EFI system in 2009. Now, Kohler has more than 30 EFI models and offers the expertise gained over the last 20 years to serve application manufacturers.

*\*Compared to a comparable KOHLER carbureted engine under comparable loads and duty cycles*

“Since it was initially launched, our EFI technology has been widely incorporated by equipment manufacturers and has been well received by end users in a variety of industries,” said Ben Marotz, Marketing Manager for KOHLER Engines. “When you’re on the jobsite, reliability, ease-of-use and efficiency are critical and it’s rewarding to offer an engine that now brings these benefits to single-cylinder applications all around the world.”

The Command PRO EFI ECH440 also offers quiet, stable performance and features a three-year limited commercial warranty. For additional product details, visit [KohlerPower.com](http://KohlerPower.com).

### **About Kohler Engines**

Kohler began manufacturing engines more than 90 years ago and has continually enhanced its product lineup in an effort to help make life easier and more profitable for end users around the globe. Today, the company offers a full array of diesel, gasoline and gaseous-fueled engines – up to 140 hp. – which are supplied to equipment manufacturers worldwide in the construction, agricultural, industrial and lawn and garden markets.
